

Academic Jobs Online

Access thousands of jobs in academia

Working with notable employers, AJO provides pathways to higher education occupations

What is AJO?

 Higher-ed job posting website used by 10000+ institutions and applicants in 75+ countries

 Originally launched in 2006, but much of its code comes from the 90s

 The functionality of the site has expanded, but UI and design have largely remained the same

AJO
Code<+>

This site is under development as a Duke Code+ Project.

MODERN UI

 A clean, redesigned UI that does wonders to the improvement of the user experience and ease of site usage. Pages feel less clunky, jumbled, and confusing, allowing for users to perform the same tasks with less time wasted on navigating the site.

INTUITIVE FEATURES

 New features added to the site such as new ways to search lists, browse jobs, and make changes to your portfolio ensure the user knows what each thing does and allows them to do a plethora of tasks much easier than before.

MOBILE COMPATIBILITY

 We have optimized the implemented pages to ensure AJO works as intended on all devices, from desktops to smartphones. That way, you can browse jobs, make changes to your portfolio, and more at home or on the go.
