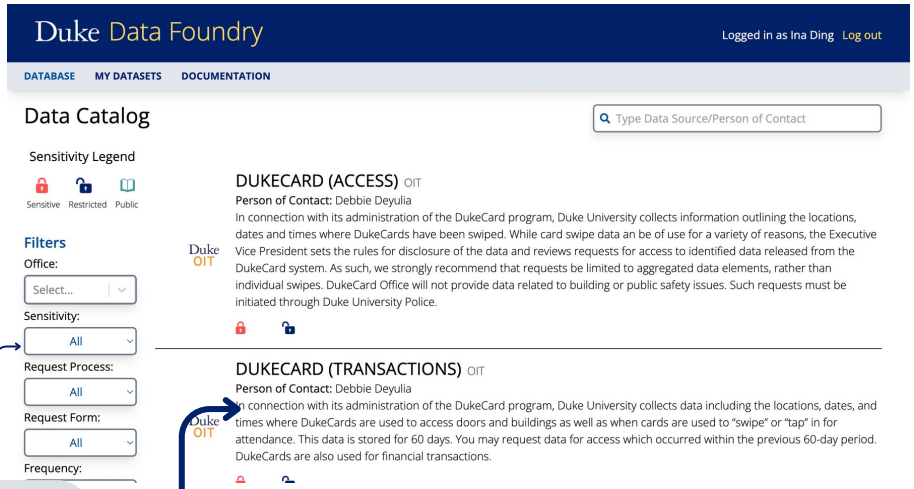
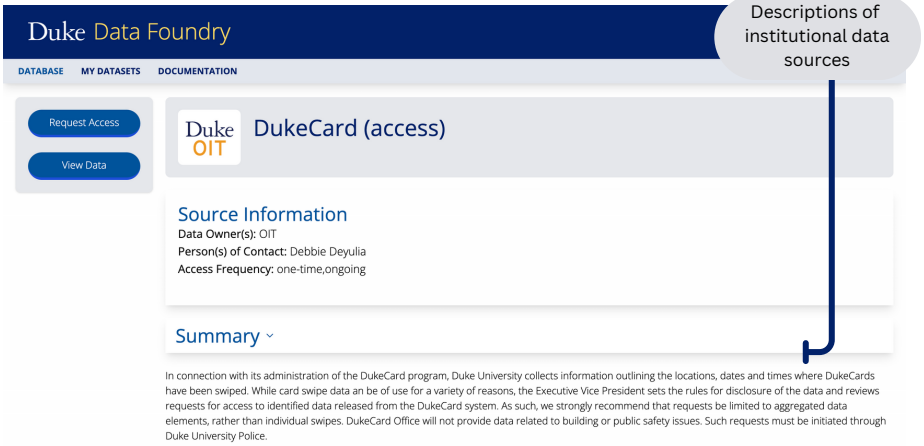
Duke University Code

PROBLEM

- Lack of a centralized request process to access institutional data
- Poor transparency and accessibility around data collected by the university
- Bottlenecks that create long wait times for researchers to gain access to data



Filter dropdowns to find data sources easily



Descriptions of institutional data sources

FEATURES

Data Catalog Display
- Ordered alphabetically

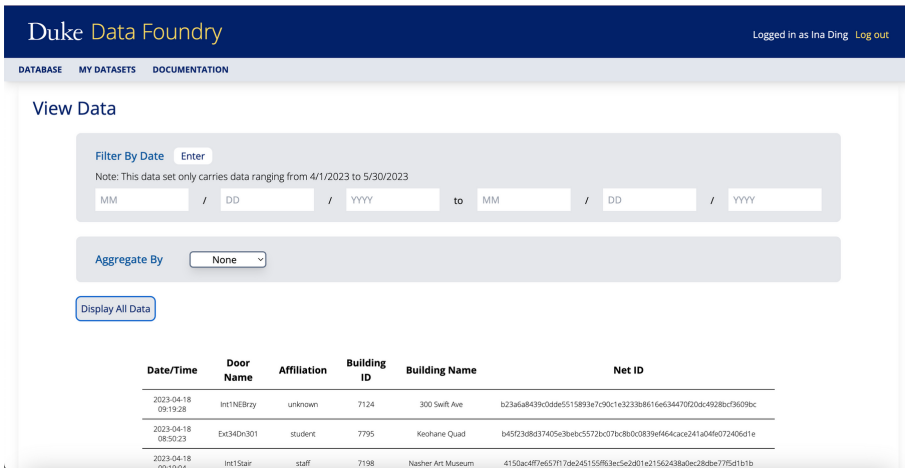
Filters & Search Bar
- Enhances specificity
- Easier search process

Shibboleth authentication
- Saves dataset access
- Increased security

View and Request Data
- Displays de-identified data
- Can be aggregated by variables
- View data by specific date range

NEXT STEPS

Partnering With More Data Owners
- The more exhaustive our app is with partnering with all data collectors around campus, the better we serve users

Centralizing Owner-Submitted Data
- Streamlining the process of adding more data sources to our app


Utilizing Grouper to Monitor Access Statuses
- Connecting our app with Grouper to better keep track of user access statuses to data sets
